

Bona Atomic® 110

- Portable Atomic DCS® system
- Operates on 110v power/20 amp outlet
- Cyclonic separation system with 30-gallon dust barrel
- Operates two machines up to 50 feet apart
- Marketing program:
 - Brochures
 - Ads/Mailers
 - Consumer Educational Videos
 - ...and more

The ground-breaking Atomic® 110 Dust Containment System runs off 110v and can be plugged into any 20 amp outlet for hours of operation. Weighing in at only 170 pounds, Atomic® 110 is portable and easy to take to any job site, whether it be a single-family home or a high-rise building.

The Atomic® 110's brushless vacuum motors are more efficient, more powerful, last longer and require less

maintenance than brush motors. These powerful motors can run two machines at the same time: a "big sander machine" and an edger, two edgers, two buffers or other combinations. Another great advantage of the Atomic® 110 is the innovative cyclonic separation system and 30-gallon dust barrel. These features allow for effective dust evacuation and hours of operation before you have to empty the dust bag.

TECHNICAL SPECIFICATIONS

- **2 X 110 Volt Superflow Tangential Discharge EC motors** (dust does not flow through motor)
- **1800 watts of motor power in two motor bank**
- **18 amp** (requires clear 20 amp circuit)
- **30-gallon dust collection drum**
- **245 CFM**
- **90 inches of water lift**
- **Non-marking transport wheels**
- **Lightweight crush-resistant, non-marking vacuum hose**
- **Machine weight** 170 lbs.
- **Dimensions** 44"H x 44"L x 27"W
